## WORK EXPERIENCE

### **MEAT Code August 2020 - Present** Frontend Developer (Semi-Senior)

*Santiago, Chile*

- I work with the following technologies: HTML, CSS, Javascript, Vue, and React.
- Adapt figma mockups from designers.

### **Project Examples:**

<https://www.pcfactory.cl/> **HTML, Sass, Javascript (ES6)**

[www.gacmotor.cl](http://www.gacmotor.cl) **HTML, Sass, Javascript (ES6)**

<https://sinotruk.dmeat.cl/> **HTML, Sass, Javascript (ES6) and React**

## PERSONAL PROJECTS

### **Next With Strapi**

*React, Next.js, Strapi*

- Built a blog demonstrating features using Static Side Generation functions from Next.js, implemented multilanguage, and display of articles and single article with Markdown.
- **Frontend technologies:** React, Next.js, Styled Components, Apollo Client (GraphQL on the frontend)
- **Backend technologies:** Strapi (generates CRUD with either a REST or GraphQL API, in this case I used GraphQL). Also implemented a custom schema for querying articles by slug and incrementing likes for an article.
- **Link:** <https://github.com/raulsaavedra/next-with-strapi>

### **Kungfu API**

*GraphQL, Apollo Server, MongoDB*

- Built a GraphQL API that retrieves kung fu actors and saves them in a database. You have queries for retrieving the actors and actor by id, a mutation for adding a new actor, and subscription to listen to changes.
- **Link:** <https://github.com/raulsaavedra/kungfu-api>

## SKILLS & INTERESTS

**Skills:** HTML, CSS, Javascript, Typescript, React & React Native, Next.js, Expo (Primary Skills), Node.js, GraphQL, English and Spanish Fluency.

**Interests:** Traveling, reading, fitness, martial arts.

## EXPERIENCIA DE TRABAJO

### **MEAT Code August 2020 - Presente** Frontend Developer (Semi-Senior)

*Santiago, Chile*

- Trabajo con las siguientes tecnologías: HTML, CSS, Javascript, Vue, and React.
- Adapto mockups de Figma de diseñadores.

### **Ejemplos de Proyectos:**

<https://www.pcfactory.cl/> **HTML, Sass, Javascript (ES6)**

[www.gacmotor.cl](http://www.gacmotor.cl) **HTML, Sass, Javascript (ES6)**

<https://sinotruk.dmeat.cl/> **HTML, Sass, Javascript (ES6) and React**

## PROYECTOS PERSONALES

### **Next With Strapi**

*React, Next.js, Strapi*

- Construí un blog demostrando features como Static Side Generation functions de Next.js, implementé multi idioma y listado de artículos y artículo single con Markdown.
- **Tecnologías Frontend:** React, Next.js, Styled Components, Apollo Client (GraphQL para el frontend)
- **Tecnologías Backend:** Strapi (genera CRUD con una API REST o GraphQL, en este caso usé GraphQL). También implementé un custom schema para hacer query de artículos por slug y añadir likes a un artículo.
- **Link:** <https://github.com/raulsaavedra/next-with-strapi>

### **Kungfu API**

*GraphQL, Apollo Server, MongoDB*

- Construí una API GraphQL que obtiene actores de kung fu y los guarda en una base de datos. Tienes queries para obtener los actores y actor por un id, mutaciones para añadir un actor, y suscripciones para escuchar a cambios.
- **Link:** <https://github.com/raulsaavedra/kungfu-api>

## HABILIDADES e INTERESES

**Habilidades:** HTML, CSS, Javascript, Typescript, React & React Native, Next.js, Expo (Habilidades primarias), Node.js, GraphQL, Fluencia en Español y Inglés.

**Intereses:** Viajar, libros, fitness, artes marciales.
