WORK EXPERIENCE

MEAT Code August 2020 - Present Frontend Developer (Semi-Senior)

Santiago, Chile

- Worked with the following technologies: HTML, CSS, Javascript, Vue, and React.
- Adapted figma mockups from designers.

Project Examples:

<https://www.pcfactory.cl/> **HTML, Sass, Javascript**

www.gacmotor.cl **HTML, Sass, Javascript and Vue**

<https://sinotruk.dmeat.cl/> **HTML, Sass, Javascript and React**

PERSONAL PROJECTS

Next With Strapi

React, Next.js, Strapi

- Built a blog demonstrating features using Static Site Generation functions from Next.js, implemented multilanguage, and display of articles and single article with Markdown.
- **Frontend technologies:** React, Next.js, Styled Components, Apollo Client (GraphQL on the frontend)
- **Backend technologies:** Strapi (generates CRUD with either a REST or GraphQL API, in this case I used GraphQL). Also implemented a custom schema for querying articles by slug and incrementing likes for an article.
- Link: <https://github.com/raulsaavedra/next-with-strapi>

Kungfu API

GraphQL, Apollo Server, MongoDB

- Built a GraphQL API that retrieves kung fu actors and saves them in a database. You have queries for retrieving the actors and actor by id, a mutation for adding a new actor, and subscription to listen to changes.
