## WORK EXPERIENCE

### **Xepelin | February 2022 - Present | Frontend Developer (Semi-Senior)**

*Santiago, Chile (Remote)*

- I work with the following technologies: HTML, CSS (with Styled Components), Typescript, React, Next.js, and Sanity.io as a headless CMS.
- I maintain the current [Website](#), [Blog](#) and [Newsroom](#)
- I implement landing pages from figma mockups, working along SEO and Performance experts to implement best practices.
- I developed the [Blog](#) and [Newsroom](#) from scratch. I used React for the frontend and Next.js as a framework to take advantage of SSG (Static Site Generation) and also implemented a complex content management system tailored to our brand using the headless CMS [Sanity.io](#)
- I created a dynamic landing page system for our website using Sanity.io (more info on the [technology here](#)), allowing non-coders to create and modify landing pages using React components as building blocks.
- Developed a A/B Testing strategy using Sanity.io as the content source and [Flagsmith](#) to assign users to different versions.

### **MEAT Code | August 2020 - February 2022 | Frontend Developer (Semi-Senior)**

*Santiago, Chile (Remote)*

- I worked with the following technologies: HTML, CSS, Javascript, Vue, and React.
- Worked directly with clients to take project feedback.
- Adapted figma mockups from designers.

#### **Project Examples:**

<https://www.pcfactory.cl/> HTML, Sass, Javascript (ES6)

[www.gacmotor.cl](http://www.gacmotor.cl) HTML, Sass, Javascript (ES6)

## SKILLS & INTERESTS

**Skills:** HTML, CSS, Javascript, Typescript, React & React Native, Next.js (Primary Skills), Node.js, GraphQL, English and Spanish Fluency.

**Interests:** Traveling, reading, fitness, martial arts.
