WORK EXPERIENCE

Xepelin | February 2022 - Present | Frontend Developer (Semi-Senior)

Santiago, Chile

- I work with the following technologies: HTML, CSS, Typescript, React, Next.js, and Sanity.io as a headless CMS.
- I maintain the current Website, Blog and News Room
- I implement landing pages from figma mockups, working along SEO and Performance experts to implement best practices.
- I developed the Blog and Newsroom from scratch. I used React for the frontend and Next.js as a framework to take advantage of SSG (Static Site Generation) and also implemented a complex content management system tailored to our brand using the headless CMS Sanity.io
- I created a dynamic landing page system for our website using Sanity.io (more info on the technology here), allowing non-coders to create and modify landing pages using React components as building blocks.

MEAT Code | August 2020 - February 2022 | Frontend Developer (Semi-Senior)

Santiago, Chile

- I worked with the following technologies: HTML, CSS, Javascript, Vue, and React.
- Worked directly with clients to take project feedback.
- Adapted figma mockups from designers.

Project Examples:
https://www.pcfactory.cl/ **HTML, Sass, Javascript (ES6)**
www.gacmotor.cl **HTML, Sass, Javascript (ES6)**
https://sinotruk.dmeat.cl/ **HTML, Sass, Javascript (ES6) and React**

PERSONAL PROJECTS

Next With Strapi

React, Next.js, Strapi

- Built a blog featuring multi-language content, display of articles and single articles.
- **Frontend technologies**: React, Next.js, Markdown, Styled Components, Apollo Client (GraphQL on the frontend)
- **Backend technologies**: Strapi (generates CRUD with either a REST or GraphQL API, in this case I used GraphQL).
