WORK EXPERIENCE

Xepelin | February 2022 - Present | Software Engineer (Full-Stack)

Santiago, Chile (Remote)

- I work with the following technologies: HTML, CSS (with Styled Components), Typescript, React, Next.js, Node.js, and Sanity.io as a headless CMS.
- I maintain the current Website, Blog and Newsroom
- I implement landing pages from figma mockups, working along SEO and Performance experts to implement best practices.
- I developed the Blog and Newsroom from scratch. I used React for the frontend and Next.js as a framework to take advantage of SSG (Static Site Generation) and also implemented a complex content management system tailored to our brand using the headless CMS Sanity.io
- I created a dynamic landing page system for our website using Sanity.io (more info on the technology here), allowing non-coders to create and modify landing pages using React components as building blocks.
- Developed a A/B Testing strategy using Sanity.io as the content source and Flagsmith to assign users to different versions.

MEAT Code | August 2020 - February 2022 | Frontend Developer

Santiago, Chile (Remote)

- I worked with the following technologies: HTML, CSS, Javascript, Vue, and React.
- Worked directly with clients to take project feedback.
- Adapted figma mockups from designers.
- **Project Examples:**
- https://www.pcfactory.cl/ HTML, Sass, Javascript (ES6)
- www.gacmotor.cl HTML, Sass, Javascript (ES6)

SKILLS & INTERESTS

Skills: HTML, CSS, Javascript, Typescript, React (with Hooks), React Native, Next.js, Node.js, Sanity.io, English and Spanish Fluency.

Interests: Traveling, gaming, reading, fitness, martial arts.
